Boula Nessim Soliman

Full Stack Laravel Developer

6th of October City, Giza, Egypt|+201126785910|boula.n.soliman@gmail.com|Github|Linkedin

Objective

Full Stack Laravel Developer with 4+ years of experience building **scalable web and mobile platforms, APIs and third-party integrations**, from multi-tenant logistics systems to internal tooling that generates dashboards and CRUD modules automatically. Strong in **Laravel, React and React Native**, with a focus on secure, maintainable backends that other systems can integrate with.

Technical Skills

Programming & Core

- PHP, JavaScript (ES6+), SQL (MySQL, PostgreSQL), C, Java, OOP, SOLID Principles

Frameworks & Libraries

- Laravel (advanced), React.js (advanced), Next.js (mid-level), React Native (mid-level), jQuery, AJAX

Web & UI Development

- HTML5, CSS3, Bootstrap, Tailwind

APIs & Integrations

- REST APIs, Third-Party Integrations (Payment Gateways, SMS, Google Maps, Email Systems), WebSockets, Multi-tenant Architecture, Queued Jobs

Tools & Platforms

- Git (Version Control), Postman, Apache, Server Management

DevOps & CI/CD

- Docker (containerized development & deployment), CI/CD with GitHub Actions (automated testing, build & deployment pipelines)

Experience

Full Stack Laravel Developer | Parcel Express Company (Remote – Oman)
Nov 2025 – Present

- Designed and implemented a multi-tenant integration system enabling third-party platforms (Temu, AliExpress, etc.) to seamlessly integrate with the core system.
- Enhanced system security and stability through advanced encryption, API authentication, and comprehensive error handling protocols.
- Built shipment workflows covering delivery-fee, COD and commission calculations, with consistent results across merchant, driver and partner flows.
- Implemented partner-specific mappings and idempotent shipment creation, preventing duplicate shipments on retries and webhook re-deliveries.
- Enforced workspace/merchant data isolation and role-based access across the APIs, and ran external integrations as queued jobs with retries, timeouts and failure handling.
- Kept the platform compatible with both MySQL and PostgreSQL and standardised UTC storage with per-client timezone conversion.

Full Stack Laravel Developer | Aloo Company (Remote – KSA)
Oct 2024 – Nov 2025

- Designed and implemented **REST APIs** for frontend (React & Flutter), improving response efficiency by **25%**.
- Integrated **SMS & payment gateways**, enabling **secure online transactions**.
- Built **role-based dashboards** for admins & vendors, reducing operational workload by **30%**.

Full Stack Laravel Developer | Yousab Company (Remote – Egypt)
Nov 2023 – Oct 2024

- Created an internal system ("Workspace") that automatically generates new dashboard modules for the backend team — accelerating development speed and reducing setup time by over 60%.
  - Developed a dynamic React dashboard capable of connecting directly to any client's database and auto-detecting modules and input fields from table structures — enabling instant CRUD (create, edit, delete, view) functionality for any new module.
- Developed **responsive websites & mobile apps** (React, React Native) serving **5K+ monthly active users**.
- Built an **admin dashboard** for content & user management, reducing support requests by **20%**.
- Engineered **10+ API integrations**, improving system reliability and scalability.
- Implemented a **custom email system**, increasing customer engagement by **15%**.

Full Stack Laravel Developer | Marwan Group (On-site – Cairo, Egypt)
Aug 2022 – Nov 2023

- Created a **content management dashboard** (Laravel), reducing admin management time by **40%**.
- Developed APIs that improved **frontend-backend communication**, cutting errors by **20%**.
- Integrated **third-party services** (payment gateways, Google Maps), enhancing UX and driving **online sales growth by 25%**.
- Designed and deployed **company websites**, boosting brand presence and attracting **new client contracts**.

Projects

- **Portfolio:** Created to showcase websites and applications that I have developed or contributed to.
- **Parcel Express (Logistics Services Website):** Played a key role in developing and optimizing both backend and frontend components, contributing to the platform's growth and competitiveness in the Oman market.
- **ADC (E-commerce Website):** Full-stack contribution to backend & frontend, improving competitive presence in Saudi market.
- **Aloo (E-commerce Website):** Developed backend & frontend modules, enhancing performance and scalability.
- **Admin Dashboard Demo:** *(login available on request)* — Created dashboard for managing content, admins, customers, and system entities.
- **React Dynamic Dashboard Demo:** *(login available on request)* — Created dynamic React dashboard for managing content, admins, customers, and system entities.

Education

Arab Academy for Science and Technology (AAST) — B.Sc. in Computer Science (GPA 3.30 - Very Good)
Sep 2017 – Jun 2021

The American University in Cairo (AUC) — Professional Skills Program, 720 hrs (SCE)
Nov 2016 – May 2017
